

# JIRA BUG TRACKING

**Name:** Naveen Gopathi

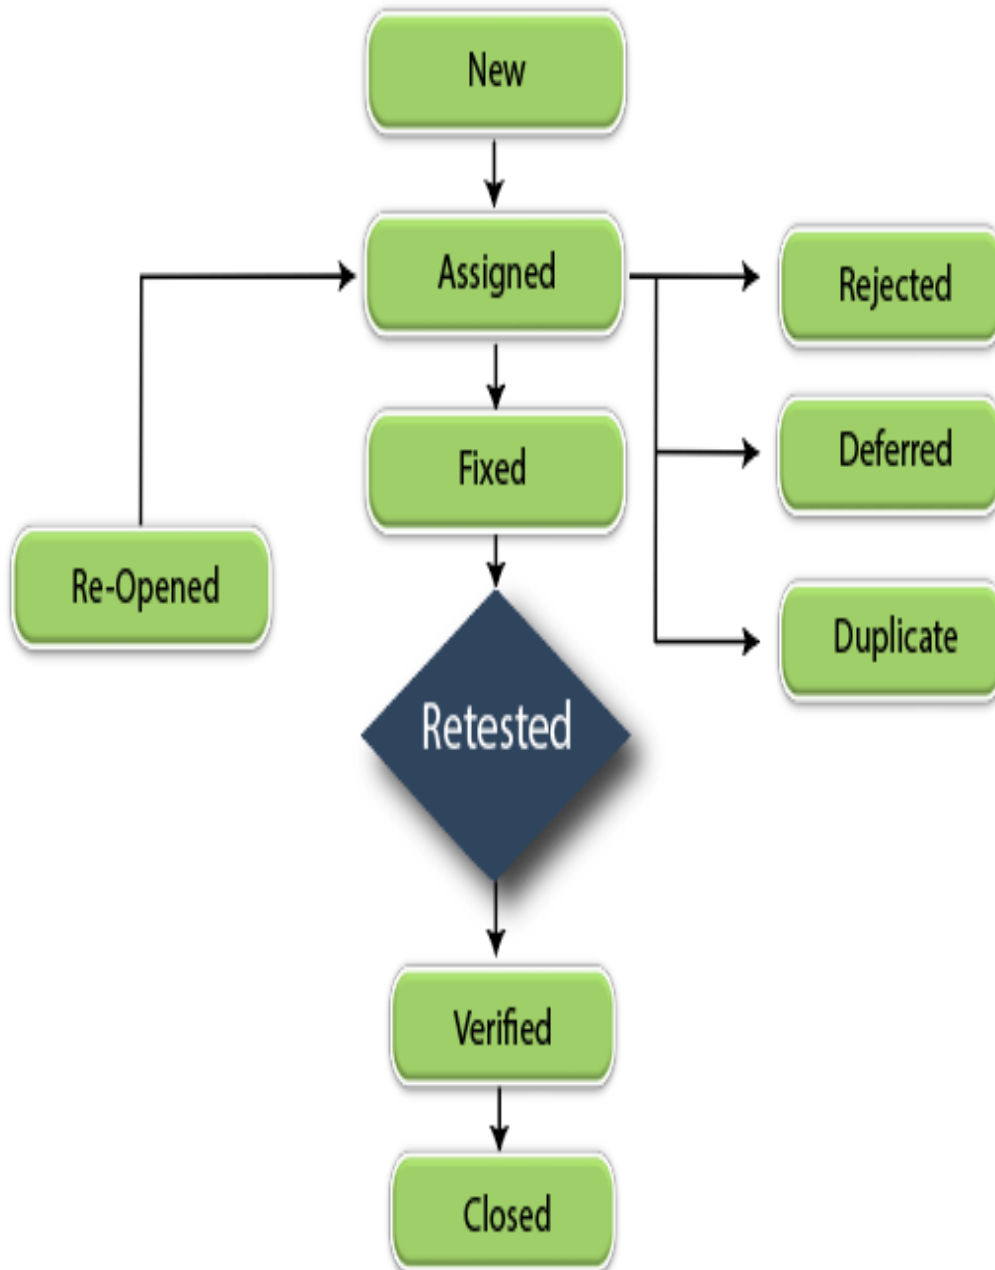

**EMPID:** ACFS 2385

**DESIGNATION:** Jr Software Engineer

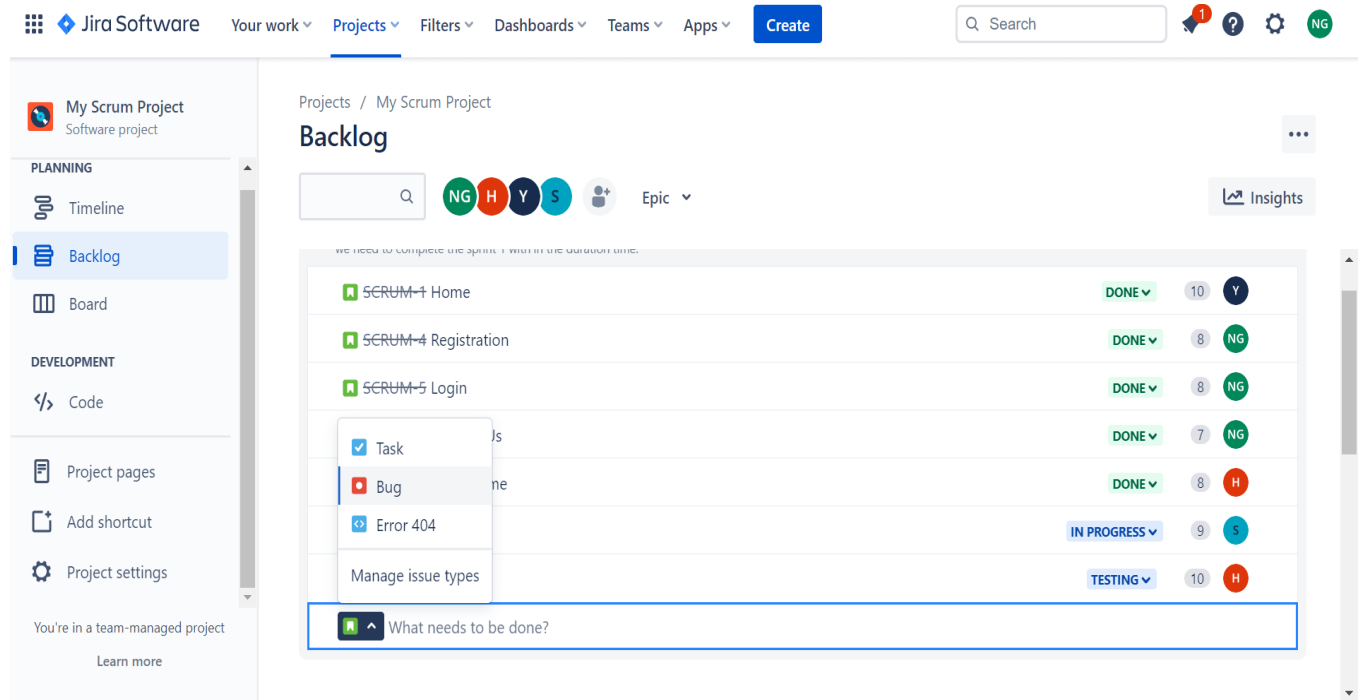

## What is a bug and issue tracking tool?

Bug and issue tracking tools help software teams find, record, and track bugs in their software. It's critical that everyone on your team is able to find and record bugs, and even more important, assign them to the right team members at the right time. A great [bug and issue tracking tool](#) gives your team a single view of all items in the backlog, regardless of whether the work item is a bug or a task related to new feature development. Having a single source of truth of all issue types helps teams prioritize against their big picture goals, while continually delivering value to their customers.
